I warning visitor if you love a ebook you should buy the original copy of this pdf to support the writer.

Chemical formula - Wikipedia A chemical formula is a way of presenting information about the chemical proportions of atoms that constitute a particular chemical compound or molecule, using chemical element symbols, numbers, and sometimes also other symbols, such as parentheses, dashes, brackets, commas and plus and minus signs. These are limited to a single typographic line of symbols, which may include subscripts and superscripts. A chemical formula is not a chemical name, and it contains no words. Although a chemical form. Details - The chemical constitution of the proteins ...
