Chickenpox - NHS Chickenpox is common and mostly affects children, although you can get it at any age. It usually gets better by itself within a week without needing to see a GP. Chickenpox - Wikipedia Chickenpox, also known as varicella, is a highly contagious disease caused by the initial infection with varicella zoster virus (VZV). The disease results in a characteristic skin rash that forms small, itchy blisters, which eventually scab over. Chickenpox in Children | Symptoms, Diagnosis and Treatment Chickenpox is an infection caused by the varicella-zoster virus. Most children have chickenpox at some stage. Most commonly, children get chickenpox before the age of 10 years. The immune system makes proteins called antibodies during the infection. These fight the virus and then provide lifelong protection against it (immunity). Therefore, it is uncommon to have more than one bout of chickenpox in your lifetime.

Chickenpox: Symptoms, treatment, causes - netdoctor.co.uk Chickenpox is a common illness which usually affects children under the age of 10. Symptoms include an itchy rash and red spots. The spots then develop into fluid-filled blisters, before turning. Chickenpox - BabyCentre UK Chickenpox is a very infectious illness caused by one of a group of herpes viruses. It causes a distinctive rash and mild flu-like symptoms. Most children will get chickenpox when they are young and it is usually a mild illness. Chickenpox | Health Information | Bupa UK About chickenpox. Chickenpox is a common infection caused by the varicella zoster virus. Children under 10 years are most likely to catch chickenpox, but you can be affected at any age.

Chickenpox - KidsHealth Chickenpox is caused by the varicella-zoster virus (VZV). This virus also can cause a painful skin rash called shingles (herpes zoster) later in life. After someone has had chickenpox, the virus stays dormant (sleeping) in the nervous system for the rest of his or her life, even though the chickenpox goes away. Chickenpox: Overview, Causes, and Symptoms - Healthline Chickenpox, also called varicella, is characterized by itchy red blisters that appear all over the body. A virus causes this condition. It often affects children, and was so common it was. How to Remove Chicken Pox Scars in Adults and Children Because itâ€™s so contagious, almost all adults in the United States over a certain age have had the chickenpox. After the vaccine became available, rates of infection dropped more than 90 percent.
